NOTES

The Wisconsin Department of Justice Office of Crime Victim Services (OCVS) provides federal funding to victim service agencies (subgrantees) around the state. The Victims of Crime Act (VOCA) grant is one of several grant programs administered by OCVS and does not encompass all victim service activities funded by Wisconsin DOJ or even all victim services provided by these agencies. This dashboard displays information about activities funded by VOCA or agency match only. Eligibility for VOCA-funded services is not dependent on the victim participating in the criminal justice system, and a victim may not report all crimes they are a victim of upon receiving services; thus, VOCA data does not represent all crime that occurs in an area.

The data presented in this dashboard is collected on a quarterly basis via the federal Performance Measurement Tool (PMT) for grant reporting purposes, and aggregated by fiscal year. The VOCA fiscal year runs from October 1 - September 30. While some follow-up is conducted either by OCVS or federal funders, the data is self-reported by subgrantee agencies and subgrantees are responsible for the accuracy of their data.

More information about Wisconsin OCVS grant programs and the VOCA grant can be found [here](#).

Project Background and Purpose

Collaboration between WI SAC and VOCA Victim Assistance Grant Program

- Share data with VOCA subgrantees, demonstrate utility of required grant reporting data
- Share data with the public
- Respond to internal information requests

Working with VOCA Data

CRIME TYPES

Fiscal Year

2022-2023

Agencies may be headquartered in one county but perform services in multiple counties. The map shows agencies' data based on the address of their main offices.

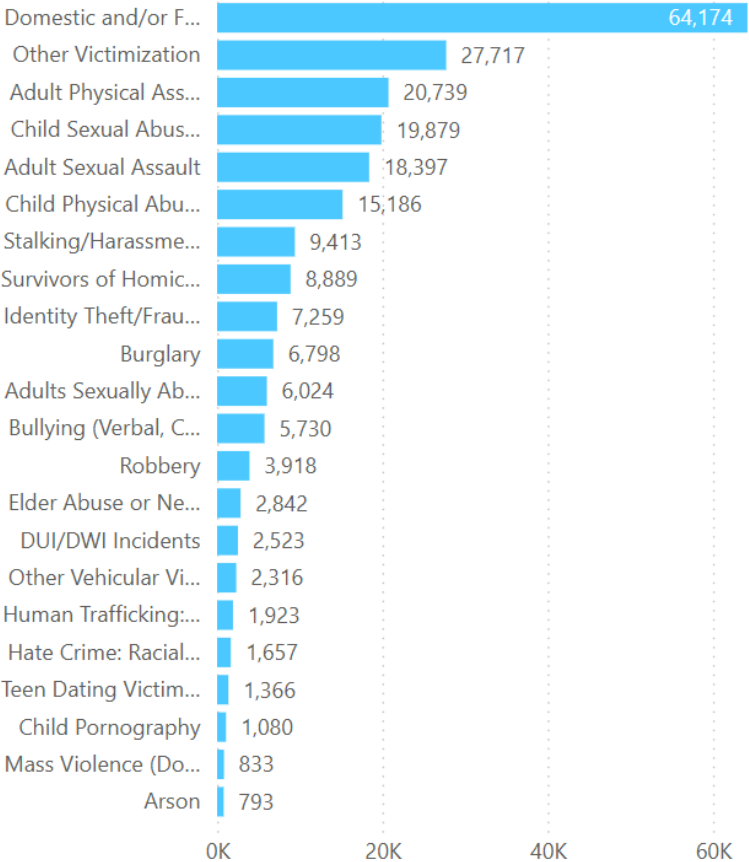

Victimizations may include duplicates because each victimization is counted in every quarter a victim/survivor received services for that victimization.
